

**BEVO AGRO INC.**

**CONSOLIDATED  
FINANCIAL STATEMENTS**

**YEARS ENDED  
JUNE 30, 2015 AND 2014**

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of BEVO AGRO INC.

We have audited the accompanying consolidated financial statements of BEVO AGRO INC., which comprise the consolidated balance sheets as at June 30, 2015 and June 30, 2014 and the consolidated statements of operations and comprehensive income, changes in equity and cash flows for the years ended June 30, 2015 and June 30, 2014, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **1. Nature of operations**

Bevo Agro Inc. (the “Company”) was incorporated July 9, 1985, under the *Company Act* of British Columbia, which has been replaced with the *Business Corporations Act* (British Columbia). The Company’s common shares are traded on the TSX Venture Exchange under the symbol “BVO”.

The Company’s principal place of business is located at 7170 Glover Road, Milner, British Columbia, Canada, V0X 1T0.

The Company operates 45 acres of propagation greenhouse facilities on 98 acres of land in Milner, BC and 20 acres of land in Pitt Meadows, BC. The Company’s main products are the propagation of vegetable plants such as tomatoes, peppers, cucumbers, and other plants such as bedding plants, flowers and grasses. The Company markets its products to established greenhouse growers, nurseries and retail outlets throughout North America.

### **2. Significant accounting policies**

#### **Basis of preparation**

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The consolidated financial statements are presented in Canadian dollars, which is also the Company’s functional currency. The accounting policies set out below have been applied consistently to all periods presented.

#### **Consolidation**

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries: Bevo Farms Ltd. (Milner, BC), Bevo Energy Inc. (Milner, BC), Bevo Agro Inc. (Nevada) and Bevo Farms Inc. (Arizona). Bevo Energy Inc. (Milner, BC), Bevo Agro Inc. (Nevada) and Bevo Farms Inc. (Arizona) are inactive. All significant intercompany balances and transactions have been eliminated upon consolidation.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **2. Significant accounting policies (continued)**

#### **Use of estimates and judgements**

The preparation of consolidated financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses. Management uses historical experience and various other factors it believes to be reasonable under the given circumstances as the basis for its judgements, estimates and assumptions.

Significant areas requiring management's judgement include the useful lives of property, plant and equipment, calculation of deferred income taxes and the likelihood of realization of same, calculation of fair value of biological assets, recovery of accounts receivable, fair value of financial instruments, choice of revaluation frequency on property, plant and equipment measured at revalued amounts, and the assumptions used in the calculation of stock-based compensation expense. While management believes the estimates are reasonable, actual results could differ from those estimates and may impact future results of operations and cash flows.

#### **Foreign currency translation**

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies have been translated into Canadian dollars at the rate of exchange prevailing at the balance sheet date and non-monetary items are translated at rates of exchange in effect when the assets are acquired or obligations incurred. Revenue and expense items are translated at the average rate of exchange for the year. Foreign exchange gains and losses are included in operations.

#### **Inventories**

Inventories, other than biological assets, are measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less any cost to complete and sell the goods.

The cost of supplies inventories includes expenditures incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their existing location and condition.

Biological assets (work in progress) are measured at fair value less costs to sell.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **2. Significant accounting policies (continued)**

#### **Income taxes**

The Company follows the balance sheet method of accounting for income taxes. Under this method of tax allocation, deferred tax assets and liabilities are determined based on differences between the financial statement carrying values and their respective income tax basis (temporary differences). Deferred tax assets and liabilities are measured using the tax rates expected to be in effect when the temporary differences are likely to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is included in operations in the period in which the change is enacted or substantively enacted. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilized. Offsetting of deferred tax assets and liabilities occurs when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

#### **Cash and cash equivalents**

Cash and cash equivalents consist of cash and highly liquid investments, having maturity dates of three months or less from the date of purchase, and are readily convertible into a known amount of cash. The Company's cash and cash equivalents are invested with major financial institutions.

#### **Trade receivables**

Trade receivables are measured at amortized cost net of allowance for uncollectible amounts. The Company determines its allowance based on a number of factors, including length of time an account is past due, the customer's previous loss history, and the ability of the customer to pay its obligation to the Company. The Company writes off receivables when they become uncollectible.

#### **Revenue recognition**

Revenue comprises the fair value of consideration received or receivable for the sale of goods and services in the ordinary course of the Company's activities. Revenue is shown net of value-added tax, returns, rebates and discounts, and after eliminating intercompany sales.

Revenue is recognized when the risk and rewards of ownership pass to the buyer, the amount of revenue can be reliably measured, the costs and possible return of goods can be reliably measured, there is no continuing management involvement or control with the goods, and when collection is reasonably assured. This generally occurs when the products are shipped from the Company's premises.

#### **Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. Other borrowing costs not directly attributable to a qualifying asset are expensed in the period incurred.

# BEVO AGRO INC.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### 2. Significant accounting policies (continued)

#### Property, plant and equipment

Land held for use in production or administration is accounted for using the revaluation model and is stated at revalued amounts. Revalued amounts are fair values determined by appropriate external revaluation methods. Land is revalued every three years, with the next valuation to take place June 2017.

Any revaluation surplus arising upon appraisal of land is recognized in other comprehensive income and credited to “revaluation surplus” in equity. Any revaluation decrease arising upon appraisal of land is charged to other comprehensive loss and, to the extent of any credit balance existing, debited to revaluation surplus in equity with the excess recognized in net income or loss.

As land is assumed to have an unlimited useful life, it is not depreciated. All other items of property, plant and equipment (“PPE”) are carried at cost less accumulated depreciation and accumulated impairment losses. The cost of an item of PPE consists of the purchase price and any costs directly attributable to bringing the asset to the location and condition necessary for its intended use.

When an item of plant and equipment comprises major components with different useful lives, the components are accounted for as separate items of plant and equipment.

Estimates of residual values and useful lives of all items of PPE are assessed annually.

Depreciation is provided using the declining balance method at the following annual rates:

Land improvements	5%
Buildings	2.5% -10%
Greenhouse, shade and packaging equipment	5%
Machinery and equipment	5 - 30%
Equipment under finance lease	10 - 30%
Capital projects in progress	See below

Capital projects in progress include PPE in the course of construction not yet completed and ready for intended use. Capital projects in progress are carried at cost less any impairment loss, and are classified to the appropriate category of PPE once completed and ready for use. Depreciation of these assets commences when the assets are ready for their intended use.

An item of PPE is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Gains and losses on disposal of PPE are determined by comparing the proceeds from disposal with the carrying value, and are recognized in profit or loss.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **2. Significant accounting policies (continued)**

#### **Impairment**

At the end of each reporting period, the carrying amount of the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell, and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

An impairment loss is reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount. If an impairment loss reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years. A reversal of impairment loss is recognized immediately in profit or loss.

#### **Deferred costs**

Development costs are expensed unless, in management's view, they meet specific criteria related to technical, market and financial feasibility, in which case they are deferred and amortized. Amortization is then calculated on a straight-line basis over the expected period of recovery from related future revenues. These costs are reviewed on an annual basis, and if there is found to be an impairment in value, any unamortized balance will be written off as a charge to operations.

#### **Goodwill**

Goodwill is recorded at cost less any reduction for impairment. Goodwill is tested for impairment on an annual basis or when events occur that may indicate impairment.

#### **Intangible assets**

Intangible assets are amortized over their estimated useful lives, unless the life is determined to be indefinite, in which case no amortization is taken. Intangible assets with indefinite useful lives are tested for impairment on an annual basis or when events occur that may indicate impairment.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **2. Significant accounting policies (continued)**

#### **Basic and diluted earnings per common share**

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution of common share equivalents, such as outstanding stock options, in the weighted average number of common shares outstanding during the period. The Company uses the treasury stock method for calculating diluted earnings per share.

#### **Share-based payment transactions**

The Company grants stock options to allow directors and employees to acquire common shares of the Company. The fair value of options granted is recognized as an expense with a corresponding credit to contributed surplus. If and when the stock options are ultimately exercised, the applicable amounts of contributed surplus are transferred to capital stock.

The fair value of stock options is measured on the grant date, using the Black-Scholes option pricing model, and is recognized over the vesting period. At each financial reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest. The Black-Scholes options pricing model considers the following inputs:

- Exercise price
- Expected life of the award
- Expected volatility
- Current market price of the underlying shares
- Risk-free interest rate
- Dividend yield

#### **Leases**

Leases meeting certain criteria are accounted for as finance leases. The imputed interest is charged against operations. If the lease contains a term that allows ownership to pass to the Company, or there is a bargain purchase option, the capitalized value is amortized over the estimated useful life of the related asset. Otherwise, the capitalized value is amortized over the lesser of the lease term and its estimated useful life. All other leases are accounted for as operating leases and the leased assets are not recognized on the Company's balance sheet.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **2. Significant accounting policies (continued)**

#### **Agriculture – biological assets**

International Accounting Standard 41, “Agriculture”, prescribes the accounting treatment for agricultural activity. Agricultural activity is the management by an entity of the biological transformation of biological assets for sale, into agricultural produce or into additional biological assets. A biological asset is a living animal or plant. Biological assets are recognized when the Company controls the asset as a result of past events, it is probable that future benefits will flow to the Company, and the fair value can be reliably measured. A biological asset is measured on initial recognition and at the end of each reporting period, at its fair value less costs to sell. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. Cost may approximate fair value when the biological asset is at the early stage of its life and little biological transformation has taken place since the initial cost was incurred.

#### **Financial assets**

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: fair value through profit or loss, held-to-maturity, loans and receivables or available-for-sale.

Financial assets classified as fair value through profit or loss (“FVTPL”) are measured at fair value with unrealized gains and losses recognized through earnings. The Company’s cash and cash equivalents are classified as FVTPL.

Financial assets classified as held-to-maturity and loans and receivables are measured at amortized cost. The Company’s accounts receivable are classified as loans-and-receivables. At June 30, 2015 the Company has not classified any financial assets as held-to-maturity.

Financial assets classified as available-for-sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) until the investment is no longer recognized or impaired, at which time the amounts would be recorded in net income. At June 30, 2015 the Company has not classified any financial assets as available-for-sale.

All financial assets except those measured at fair value through profit or loss are subject to review for impairment at each reporting date. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after initial recognition of the asset, the estimated future cash flows of the asset has been impacted.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **2. Significant accounting policies (continued)**

#### **Financial liabilities**

All financial liabilities are initially recorded at fair value and designated upon inception into one of the following two categories: fair value through profit or loss or other financial liabilities.

Financial liabilities classified as fair value through profit or loss are measured at fair value with changes in fair value recognized in profit or loss. At June 30, 2015 the Company has not classified any financial liabilities as FVTPL.

Financial liabilities classified as other financial liabilities are measured at amortized cost using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and allocating interest expense over the relevant period. The Company's bank indebtedness, accounts payable and accruals and long-term debt are classified as other financial liabilities.

Transaction costs other than those related to financial instruments classified as FVTPL, which are expensed as incurred, are added to the fair value of the financial asset or financial liability on initial recognition and amortized using the effective interest method.

#### **Segment reporting**

The Company operates in a single operating segment – propagation and production of greenhouse products.

#### **Comprehensive income**

Comprehensive income is the overall change in the net assets of the Company for a period, other than changes attributable to transactions with shareholders. It is made up of net earnings and other comprehensive earnings. Other comprehensive income consists of gains and losses affecting shareholders' equity that are excluded from net income.

#### **Future accounting changes**

The IASB periodically issues new standards and amendments to existing standards. The following new accounting standards are those that the Company considers relevant to the Company now or in the future. It is not intended to be a complete list of new pronouncements made.

*IFRS 9 – Financial Instruments* - Addresses the classification, measurement and de-recognition of financial assets and financial liabilities, and is effective January 1, 2017, with earlier adoption permitted. IFRS 9 is not expected to have a material impact on the amounts recorded in the consolidated financial statements of the Company.

## BEVO AGRO INC.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

#### 3. Accounts receivable

	<b>June 30, 2015</b>	June 30, 2014
Trade receivables	\$ 1,159,634	\$ 1,489,376
GST receivable	39,067	49,743
	<b>\$ 1,198,701</b>	<b>\$ 1,539,119</b>

#### 4. Inventories

	<b>June 30, 2015</b>	June 30, 2014
Supplies	\$ 1,714,819	\$ 1,495,822
Biological assets	1,023,594	943,833
	<b>\$ 2,738,413</b>	<b>\$ 2,439,655</b>

Biological assets are measured at fair value less costs to sell, except when the fair value cannot be measured reliably. Since little biological transformation has taken place and all biological assets are at the early stage of their life, the Company has measured biological assets at cost, which approximates fair value.

Changes in the carrying value of biological assets are as follows:

	<b>June 30, 2015</b>	June 30, 2014
Opening value	\$ 943,833	\$ 1,495,822
Purchases	9,916,127	8,369,511
Labour inputs	4,890,326	4,557,900
Sales	(14,726,692)	(13,479,400)
Closing value	<b>\$ 1,023,594</b>	<b>\$ 943,833</b>

	<b>\$ 54,770,492</b>	<b>\$ 22,089,018</b>	<b>\$ 32,681,474</b>

Land is the only item of property, plant and equipment that is stated at fair values. The Company has a policy to revalue land every three years. At June 30, 2014 land was revalued using an external revaluation method. Land was determined to have increased in value from \$60,000 to \$70,000 per acre. As a result, land was revalued from \$5,940,000 to \$6,930,000. The revaluation surplus is recognized in other comprehensive income and credited to "revaluation surplus" in equity. A portion of the revaluation surplus is subject to deferred income taxes and is credited to deferred income tax liability.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

### 6. Goodwill

	<b>June 30, 2015</b>	June 30, 2014
Goodwill	<b>\$ 522,665</b>	\$ 522,665

Goodwill represents the excess of the purchase price over the fair values of net assets acquired in the acquisition of a propagation greenhouse facility and wood fuel supply facility.

In assessing goodwill for impairment for June 30, 2015, the Company compared the recoverable amount, using the value in use method, to the carrying amount of each cash generating unit. The recoverable amount of each cash generating unit was based on budgeted cash flows for the next five years, a terminal value based on a long-term growth rate of 3%, and a discount rate of 10%.

### 7. Bank indebtedness

The Company has a revolving line of credit with the Bank of Montreal in the amount of \$2,000,000. This line of credit bears interest at prime plus 0.50%, is due on demand, and is secured by a first charge on accounts receivable. There was no balance on the line of credit as at June 30, 2015 or June 30, 2014.

### 8. Accounts payable and accruals

	<b>June 30, 2015</b>	June 30, 2014

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### 9. Long-term debt (continued)

The Company has unused Advancer loans from Farm Credit Canada totaling \$3,500,000 that expire July 1, 2019. At any point the Company can draw down on these loans and pay interest only payments for a term of 5 years.

The Farm Credit Canada ("FCC") term loans and transition loan are secured by a general security agreement, first mortgages on the Company land and buildings and assignments of insurance. The Bank of Montreal ("BMO") demand loans are secured by equipment and accounts receivable. The De Lage Landen loan is secured by equipment.

The note payable for purchase of greenhouse will be funded by the FCC transition loan #4. Total available proceeds of this loan are \$2,500,000, of which \$833,333 has been drawn down. FCC will fund payments of \$833,333 on July 2, 2015 and \$833,334 on July 2, 2016, in accordance with the terms of the note payable.

The deferred borrowing costs are amortized as the principal on the loan is repaid and are included as interest expense (Note 20).

Principal repayments required to be made in each of the next four years and thereafter are as follows:

---

	<b>June 30, 2015</b>
2016	\$ 2,717,610
2017	12,017,718
2018	939,796
2019	4,511,130
Thereafter	49,556

### 12. Capital stock

#### Authorized:

Unlimited common shares without par value

#### Issued:

	Number of Shares	Amount
Issued and outstanding as at June 30, 2015, 2014 and 2013	25,535,933	\$ 4,008,443

Summary of stock options outstanding and exercisable as at June 30, 2015:

	Number of stock options	Weighted average exercise price
Beginning of year	750,000	\$ 0.18
Granted	750,000	\$ 0.36
Forfeited	-	-
Exercised	-	-
Expired	-	-
End of year	1,500,000	\$ 0.27

Security type	Number outstanding	Remaining contractual life (years)*	Expiry date
Stock options	750,000	5.8	May 11, 2021
Stock options	750,000	9.9	June 9, 2025

\*Weighted average life of all stocks options is 7.85 years

The Company adopted a stock option plan in 2004, which reserved 2,411,900 shares for issuance under Plan options and any outstanding prior options granted outside of the Plan. Shares reserved under Plan options or prior options that expire, terminate or otherwise cease to be exercisable will become available for the issuance of future options under the Plan, subject to the 2,411,900 share maximum.

On May 11, 2011, the Company granted stock options under its 2004 stock option plan to directors and officers for the purchase of common shares at a price of \$0.18 per share. One-third of these options vested as of May 11, 2011, one-third vested on May 11, 2012 and one-third vested on May 11, 2013. The options will expire on May 11, 2021. On June 9, 2015, the Company granted stock options under its 2004 stock option plan to directors and officers for the purchase of common shares at a price of \$0.36 per share. One-third of these options vested as of June 9, 2015, one-third will vest on June 9, 2016 and one-third will vest on June 9, 2017.

## BEVO AGRO INC.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

#### 12. Capital stock (continued)

Contributed surplus is comprised of the following:

Balance, June 30, 2014	\$	104,374
Stock-based compensation for the year		49,637
Balance, June 30, 2015	\$	154,011

During the year ended June 30, 2015, the compensation cost of stock options was \$49,637, which has been included in administrative fees, wages and benefits expense. The fair value of stock options is measured on the grant date, using the Black-Scholes option pricing model. Assumptions used included: exercise price of \$0.36, expected life of 10 years, expected volatility of 20%, current market price of \$0.36, risk-free interest rate of 1.4%, and a dividend yield of 0%.

#### 13. Capital Management

The Company defines capital that it manages as its shareholders' equity. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its business and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. As at June 30, 2015, total managed capital was \$17,142,765, compared to \$15,895,572 as at June 30, 2014.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue shares, acquire debt, or acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. These budgets are approved by the Company's Board of Directors.

In order to maximize its ongoing operations, the Company does not pay out dividends. The Company's investment policy is to invest its cash in capital assets for future corporate growth.

The Company expects the capital resources available to it will be sufficient to carry its business and operations for the next twelve months.

There were no changes in the Company's approach to capital management during the year ended June 30, 2015.

# BEVO AGRO INC.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

### 13. Capital Management (continued)

The Company is subject to externally imposed capital requirements with respect to its covenants on the Company's various credit facilities. The covenants require that the Company maintain the following ratios at year-end:

- Current ratio: greater than 1.25:1
- Debt service coverage ratio: greater than 1.20:1
- Debt / Equity ratio: less than 3.00:1

The Company was not in violation of any covenants during the year.

### 14. Changes in non-cash working capital

	2015	2014
Accounts receivable	\$ 340,418	\$ 545,065
Inventories	(298,758)	(556,726)
Prepaid expenses and deposits	123,616	(101,942)
Accounts payable and accruals	(319,263)	1,101,208
	\$ (153,987)	\$ 987,605

### 15. Financial instruments and risk management

The carrying values of cash, accounts receivable, and accounts payable approximate their fair values because of the short-term maturity of these financial instruments.

The carrying value of long-term debt and obligations under finance leases approximate their fair value upon initial recognition and subsequent to that date have been amortized using the effective interest rate method. At June 30, 2015, their carrying value approximates their fair value based on current market rates for similar financial instruments.

The following classifies financial assets and liabilities that are recognized on the balance sheet at fair value in a hierarchy that is based on significance of the inputs used in making the measurements. The levels in the hierarchy are as follows:

- Level 1- Quotes prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 – Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 – Inputs for the asset or liability that are not based on observable market data

# BEVO AGRO INC.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

### 15. Financial instruments and risk management (continued)

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

#### Foreign currency risk

Foreign currency risk is the risk that variations in exchange rates between currencies will affect the Company's operating and financial results. The Company is exposed to foreign currency fluctuations to the extent revenues earned and expenditures incurred by the Company are not denominated in Canadian dollars. From time to time the Company enters into foreign currency contracts to manage foreign currency risk.

At June 30, 2015, the Canadian/U.S. foreign exchange rate was CA\$1.00 = US\$0.8009 (2014 – US\$0.9376).

The Company currently has a U.S. dollar bank account balance of \$515,071, U.S. dollar accounts receivable of \$106,847 and U.S dollar accounts payable of \$212,038. A change of \$0.10 in the Canadian dollar would not have a material impact on the Company's income and comprehensive income for the year.

#### Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows from operations, investing and financing activities. At June 30, 2015, the Company's working capital balance was \$420,373, which indicates an ability to meet short-term obligations.

The following are the contractual maturities of financial liabilities as at June 30, 2015:

	<b>Total</b>	<b>&lt; 1 year</b>	<b>1-3 years</b>	<b>&gt; 3 years</b>
Accounts payable and accruals	\$ 2,002,029	\$ 2,002,029	\$ -	\$ -
Obligations under finance leases	43,705	30,440	13,265	-
Long-term debt	20,163,426	2,717,610	12,957,514	4,488,302
	<b>\$ 22,209,160</b>	<b>\$ 4,750,079</b>	<b>\$ 12,970,779</b>	<b>\$ 4,488,302</b>

It is the Company's intention to meet these obligations through cash provided by operating activities. If resources and operations fail to generate sufficient cash to satisfy its obligations, the Company may seek to arrange debt or other financing.

# **BEVO AGRO INC.**

## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

---

### **15. Financial instruments and risk management (continued)**

#### **Interest rate risk**

Interest rate risk consists of two components:

- (a) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (b) To the extent that changes in prevailing market interest rates differ from the interest rates in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

The Company's long-term debt is primarily at fixed interest rates. However, approximately 14% of the long-term debt is at variable interest rates and, therefore, the Company is exposed to interest rate cash flow risk during the term of the debt. A plus or minus 1% change in market interest rates would not have a significant effect on the Company's income and comprehensive income for the year.

#### **Credit risk**

Credit risk is the risk that a party to one of the Company's financial instruments will fail to discharge an obligation and will cause the Company to incur a financial loss. The Company is exposed to credit risk with respect to its cash and cash equivalents and accounts receivable. Cash and cash equivalents are placed with a major Canadian financial institution. Accounts receivable are from geographically dispersed customers and substantial portions are from customers with whom long-term business relationships have been established.

Trade receivables for each customer were evaluated for collectability and the Company felt that there was no impairment of receivables. At June 30, 2015, 73.5% (2014 – 81.1%) of trade receivables were outstanding less than 60 days, 2.9% (2014 – 7.1%) were outstanding for between 60 and 120 days, and the remaining 23.6% (2014 – 11.80%) were outstanding for more than 120 days. Trade receivables are considered past due based on the specific contract terms agreed to with a customer.

	-currency gains (losses)	278,511	(72,520)
	-other income	644,396	336,086
		\$ 26,221,677	\$ 23,309,085

AgriStability is a federal program that provides financial assistance to farms that experience declines in sales and margins due to weather, disease and low market prices. Payments are made in the form of grants, which require no repayment. The AgriStability payment of \$35,197 represents a payment for the 2011 program year.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 2015 AND 2014 (Expressed in Canadian \$)

#### 22. Earnings per share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period.

	<b>June 30, 2015</b>	June 30, 2014
Net income	\$ 1,197,556	\$ 738,745
Weighted average number of common shares outstanding during the period	25,535,933	25,535,933
Basic earnings per share	\$ 0.05	\$ 0.03

Diluted earnings per share is computed by adjusting the weighted average number of common shares outstanding to include the potential dilution of common share equivalents, such as outstanding stock options.

	<b>June 30, 2015</b>	June 30, 2014
Net income	\$ 1,197,556	\$ 738,745
Weighted average number of common shares outstanding during the period	25,535,933	25,535,933
Adjustment for stock options	1,500,000	750,000
Weighted average number of common shares outstanding during the period for diluted earnings per share	27,035,933	26,285,933
Diluted earnings per share	\$ 0.04	\$ 0.03
